**3-DAY HANDS-ON TECH CLASS Sun., Aug. 29 thru Tue., Aug. 31
16 TECH NFI CEUs; 16 TECH CSIA CEUs
MUST ATTEND ALL 3 DAYS (Limit 20)**

Instructed by industry veteran and respected NFI instructor Bob Wise, CVC Success Group

This Technical Training class is geared to individuals with a basic understanding of gas hearth appliances. We will be building on your existing foundation of knowledge and skills. This class is not appropriate for those new to these appliances.

DAY 1

- Characteristics of Fuel Gases
- Principles of Combustion
- Controlling BTU's
- Gas Pipe Sizing
- Combustion Air Requirements
- Codes and Standards: IFGC and NFGC
- Categorizing Gas Appliances
- Venting
- Millivolt Valves

DAY 2

- Electronic Valves
- Unvented Appliances
- CO Effects
- How to with tools
- Fuel conversion

DAY 3

- Interpreting Codes
- Basic Electricity
- Proper procedures for service
- Review of valves and controlling voltage
- Troubleshooting

There will be class discussion, individuals will demonstrate hands on knowledge of all aspects taught and identify where more instruction may be needed. We will break into teams for an overview of all the topics covered and class will demonstrate their knowledge upon completion.
