

Gas HOT Training

(HANDS ON TECHNICAL)

12-15 technical CEU's will be available for both days.

This gas training is tailored for newcomers and intermediate technicians, spanning two days.

KEY TOPICS COVERED

- Do's and don'ts of a successful service call
- Properties and characteristics of natural gas, propane, and bioethanol
- Components of log sets, fireplaces, inserts, and freestanding stoves, including controls and accessories
- Proper venting techniques for various hearth products, including B-vent, natural vent, direct vent, and unvented systems
- Identifying and troubleshooting millivolt systems, including Robert Shaw, Dexen, and Eurosit
- Identifying and troubleshooting IPI systems, including Proflame, Dexen, and Maxitrol

*Includes breakfast, lunch, and snacks both days.
Optional no host dinner will be available on first day.*
